Our adventure-based learning program presents groups with specific challenges that model relationships and problems that often arise in the workplace. Your group will need to communicate and apply innovative ideas in order to arrive at solutions.

These challenges help to identify the strengths and weaknesses of your work team in order to improve the overall quality of your work environment.

We do this by utilizing our ropes course, which consists of more than 25 high and low elements located within a beautiful wooded area.

By the end of the day our hope is that each participant will have extracted new knowledge and skills that will be applicable in your workplace.

## A scenic location for gatherings of all kinds

The Cayuga Nature Center overlooks Cayuga Lake and is situated on 120 acres of woods, meadows, streams and waterfalls. Hike our miles of trails, visit our many species of animals both indoors and outdoors, and experience TreeTops, our 6 story tree house. The lodge, including kitchen facilities, spacious common rooms, and cozy fireplaces, is available for rent throughout the year.
